

OX Blocks vs Zombie Dice

RULES

- 1 Ox Blocks is a game for 2 players. The object is to make a straight line of X's or O's horizontally, vertically or diagonally.
- 2 One player elects to play X's, the other O's. Either player may start by rolling any one of the Ox Blocks. If a player throws his own symbol (X or O) he may place it on the board in any position he wishes. If he throws his opponent's symbol, he must still place it on the board. In this case he will try to help his opponent as little as possible.

- 3 If either player throws a Block with the open face upwards, he may remove one of his opponents Blocks from the board. If his opponent has no Blocks on the board, he must remove one of his own Blocks.
- 4 Players take it in turns to throw the Blocks until one player makes a complete line.

THE PLAYBOARD IS PRINTED ON THE BOTTOM OF THIS BOX

This game includes these rules, 13 dice, and a cup to hold them. You'll need some way to keep score. Two or more can play.

The first player is the one who won the last game, or the one who can say "*Braaaaains!*" with the most feeling.

Mmm! Brainns!

On your turn, shake the cup, take three dice from it without looking, and roll them. Each one is a human victim. The red dice are the toughest. Green are easiest, and yellow are medium tough.

The dice have three symbols:

Brain – you ate your victim's brain. Set your Brain dice to your left.

Shotgun – he fought back! Set your Shotgun dice to your right.

Footprints – your victim escaped. Keep your Feet dice in front of you. If you choose to roll again, you will re-roll these dice, along with enough new ones to bring the total to three.

If you rolled three shotguns, your turn is over. Otherwise, you can choose to stop and score, or continue.

If you decide to **stop**, score 1 for each Brain you have, and put all the dice back into the cup. It's the next player's turn.

If you choose to **keep going**, leave all your Feet on the table. Unless all three of your dice are Feet, take enough random new dice from the cup to total three, and roll again. Whenever you roll, you will roll three dice at a time.

After you take new dice, you can't decide to stop . . . you have to roll.

Set aside Brains and Shotguns as above. If you are up to 3 Shotguns, your turn is over and you score **nothing**. Otherwise, you can stop and score, or take another roll . . .

Brrrains?

If you don't have three dice left in the cup, make a note of how many Brains you have and put them all in the cup (keep the Shotguns in front of you). Then continue.

BRAAAAINS!!!

Play until someone reaches 13 Brains. Then finish the round. Whoever has the most Brains at the end of that round is the winner. If there's a tie, the leaders (only) play a tiebreaker round.

Brain

Shotgun

Footprints
